Profile summary

B.Tech Computer Science and Engineering (Semester 5) student with hands-on experience in Artificial Intelligence, Machine Learning, Computer Vision, Full-Stack Development, and DevOps fundamentals. SIH 2025 Grand Finalist and Junior Development Intern at White Matrix Info Solutions, experienced in developing AI-driven applications and scalable web solutions. Built an Autonomous Illegal Mine Detection system using AI and computer vision to address environmental and safety challenges, along with multiple full-stack and blockchain-based applications. Passionate about leveraging AI, data, and modern software engineering practices to build intelligent, scalable solutions while continuously enhancing technical expertise through projects, hackathons, and industry experience.

Work Experience

- Intern at White Matrix: Engineering scalable web architecture June 2025 – Present
 - Full Stack Developer —
Built Startup Quest, a gamified web platform empowering student innovators using React, Node.js, and Ethereum smart contracts.
 - Designed token-based voting and reward mechanisms (QST tokens) for idea validation and community engagement.
 - AI developer-
Developed an AI-powered detection system for identifying illegal mining activities using satellite imagery and Python-based automation.
 - Team work: SIH'25 team lead, Collaborated with many team to design and build projects, blockchain integration, and testing.
 - Developer, College Website Team: Building and maintaining the official institutional platform.
-
- Christ College of Engineering (Autonomous) 2024 – 2028
B.Tech in Computer Science
 - ST JOSEPH EMHSS ALOOR
12th Standard

Projects

- Built Astra-ALM, a multimodal AI engine for sub-200ms tactical intelligence.
- Developed an AI-powered monitoring system to detect and report illegal mining activities using satellite imagery and automated alert generation.
- Developed “Startup Quest” — a gamified web platform that empowers student innovators through Ethereum-based rewards, quests, and community-driven idea validation
- Blockchain Certification UI: Frontend for a blockchain-based sustainability verification system. React + Cursor AI.

Skills

- Languages: C, C++, Python, JavaScript, SQL
- Frontend: React.js, HTML, CSS, Framer Motion
- Backend: Django, Express (Node.js)
- Database: PostgreSQL, MongoDB
- DevOps Tools: Docker, Git,
- Others: Canva, Figma, Postman, OpenAI API

Technical Events

- Smart India Hackathon 2025 grandfinalist
- 36-HourHackathon— secured 2nd prize at hackathon conducted by GEC KOLLAM
- 3 Debugging Contests – Real-time bug fixing challenges.
- 3 Idea Pitches – Startup validation and pitching experience.
- synovita – Secured 2nd prize in idea pitching competition.
- Startup Simulation – Ranked Top15 in “War Room” by GEC THRISSUR

Workshops and Conferences

- UI-UX Workshop – Sahridaya college of Engineering
- Sustainable Development Conference – CUSAT
